NOTA 1: Zonas de abastecimento controladas - FONTANÁRIOS DA MAIA

Informação complementar relativa à averiguação das situações de incumprimento dos VP (causas e medidas correctivas):

1. Incumprimento dos parâmetros "Ferro", "Manganês" e "alfa total" no Ponto de Amostragem 1 (Fontanário 1), em 5 de maio de 2016 e informado pelo laboratório em 16, 17 e 24 de maio de 2016 respetivamente, cujas causas se devem às características naturais (hidrogeológicas) da origem de água.

1. Medidas correctivas - No que diz respeito aos parâmetros "Ferro" e Manganês" não foram tomadas medidas porque as análises posteriores não confirmaram o incumprimento. No âmbito do parâmetro "alfa total" foram seguidas todas as recomendações do DL n.º 23/2016, de 3 de junho com a análise aos radionuclídeos listados (U238, Po210, Ra226 e U234), para posterior cálculo da Dose Indicativa que veio confirmar um valor inferior ao Valor Paramétrico.
